Statement by the Executive Board

The board of directors and the executive Board today considered and approved the annual report of MyBlueLabel Compliance Services A/S for the period 1 July 2021 – 30 June 2022.

The annual report, is prepared in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements give a true and fair view of the company's financial position as at 30 June 2022, and of its financial performance for the financial year 1 July 2021 – 30 June 2022.

In our opinion, the management's review gives a true and fair view of the matters dealt with in the review.

We recommend that the annual report be adopted by the annual general meeting.

Rungsted, 22 September 2022

Marie-Louise Little

Independent Auditor's report

To the Shareholders of MyBlueLabel Compliance Services A/S

Opinion

We have audited the financial statements of MyBlueLabel Compliance Services A/S for the financial year 1 July 2021 - 30 June 2022, which comprise income statement, balance sheet, statement of changes in equity, notes and a summary of significant accounting policies. The Financial Statements are prepared under the Danish Financial Statements Act.

In our opinion, the Financial Statements give a true and fair view of the Company's financial position at 30 June 2022, and of the results of the Company operations for the financial year 1 July 2021 - 30 June 2022 in accordance with the Danish Financial Statements Act.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the "Auditor's Responsibilities for the Audit of the Financial Statements" section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (IESBA Code) and the additional ethical requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter

We draw attention to note 6 of the financial statements in which management has described the company's capital resources for the coming year and factors related to the current strategy. Our opinion is not modified in respect of this matter.

Management's Responsibilities for the Financial Statements

Management is responsible for the preparation of Financial Statements that give a true and fair view in accordance with the Danish Financial Statements Act, and for such internal control as Management determines is necessary to enable the preparation of Financial Statements that are free from material misstatement, whether due to fraud or error.

In preparing the Financial Statements, Management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting in preparing the Financial Statements unless Management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually

Independent Auditor's report

or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Financial Statements.

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the Financial Statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and contents of the Financial Statements, including the disclosures, and whether the Financial Statements represent the underlying transactions and events in a manner that gives a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Statement on Management's Review

Management is responsible for Management's Review. Our opinion on the Financial Statements does not cover Management's Review, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Financial Statements, our responsibility is to read Management's Review and, in doing so, consider whether Management's Review is materially inconsistent with the Financial Statements or our knowledge obtained during the audit, or otherwise appears to be materially misstated.

Moreover, it is our responsibility to consider whether Management's Review provides the information required under the Danish Financial Statements Act.

Management's Review

Principal Activities

MyBlueLabel Compliance Services provide LegalTech for Life Science and other industries to ensure “Hard Law” EU and FDA Approvals. Furthermore, MyBlueLabel follow global recognized sustainable initiatives including membership of the UN Global Compact Network and develop services within Green Compliance. It is MyBlueLabel’s ambition to become the best eCompliance solution to support responsible, next generation companies in their pursuit to help millions of patients worldwide.

Comments related to going concern:

The company has already been at a break-even stage in November 2021; however, it is a strategic business decision to scale the current potential and striving to meet an even larger customer base. In this growth process of commercialization, an investment in sales (people) has been made. Due to these investments, it is not expected that the company will be profitable in the coming years as revenue will be reinvested into further growth. It is however possible to change strategy at any given time to focus on revenue instead of scale. Until then the company remains dependent on financial support from investors.

The company has secured funding for its current strategy that supports the operations until end of 2022. Management expects that the company will be able to attract further funding in Q3 and Q4 of 2022 to support the growth strategy in 2023 based on the current status and initial discussions with potential investors.

On this basis, the management presents the accounts for the company on the assumption of continued operations.

Development in activities and financial affairs:

Global-scale events have affected investor willingness. Nonetheless, MyBlueLabel Compliance Services (MBL) have in this financial year acquired funding that will support its continuous growth. Coupled with an increasing client revenue, MBL has good conditions for further growth. MBL added clients to the portfolio, increased income and got positive feedback from clients. The churn rate is close to zero only churned by startup companies which has closed down operations. MBL has invested in increasing the sales team and process expert resources, and is set up and ready to execute on the strategy.

Events after the end of the financial year:

The customer base has continued to grow after end of the financial year. Resources have been allocated to important activities such as Sales, Marketing, Branding, and Communication as well as delivery. MBL continues to focus on product development to increase customer satisfaction and competitiveness. A special thanks to our investors, employees, and partners for the work they put into our common cause of ensuring patient safety and quality for millions worldwide. We would also like to reiterate our appreciation to the state-owned Innovation fund for financial contributions.

Expected financial developments

MBL has initiated its growth strategy and will continue to on-board customers and employees. High revenue growth is possible because there are large unmet needs, the MBLs digital services are flexible, scalable, and replicable. We plan further upscaling of the MBL team and development of partnerships. Our solutions and the team behind it can operate across all the compliance areas in Life Science and other industries and support the green compliance initiative, helping companies to reduce time to market and reduce compliance costs. Furthermore, MBL has started to operate across industries where mega-trends within “hard law” like GDPR and “soft law to hard low” like Green Compliance.

The company is severally and jointly liable together with the parent company CANI-IT ApS for company taxes and taxes on dividends and royalties in the joint taxation group. Payable taxes in the joint taxation group is disclosed in the parent company financial statements.

8 Securities and guarantees

None.

Accounting Policies

General

The annual report was prepared in accordance with the provisions of the Danish Financial Statements Act for reporting class B.

In addition, the Company has decided to observe certain provisions from higher reporting classes.

The financial statements have been prepared according to the same accounting policies as last year.

General principles for recognition and measurement

Assets are recognised in the balance sheet when it is probable that future economic benefits will flow to the company and the value of the asset can be measured reliably.

Liabilities are recognised in the balance sheet when it is probable that future economic benefits will flow out of the company and the value of the liability can be measured reliably.

On initial recognition, assets and liabilities are measured at cost. Subsequently, assets and liabilities are measured as described below for each individual item.

Certain financial assets and liabilities are measured at amortised cost, implying the recognition of a constant effective interest rate to maturity. Amortised cost is determined as original cost less any repayments and with addition/deduction of the accumulated amortisation of the difference between cost and nominal amount.

In recognition and measurement, foreseeable losses and risks are taken into consideration when arising before the annual report is prepared and proving or disproving matters existing on the balance sheet date.

Income is recognised in the income statement as earned, including value adjustments of financial assets and liabilities measured at fair value or amortised cost. Also recognised are expenses incurred to generate the earnings for the year, including depreciation, amortisation, impairment losses and provisions, as well as reversals resulting from changes in accounting estimates of amounts previously recognised in the income statement.

Foreign currency translation

During the year, foreign currency transactions are translated at the exchange rates prevailing on the transaction date. Foreign currency receivables, payables and other items that have not been settled on the balance sheet date are translated at the exchange rates prevailing on the balance sheet date.

Realised and unrealised foreign currency translation adjustments are recognised in the income statement under net financials.

Financial instruments are not used to hedge the value expressed in Danish currency of balance sheet items in foreign currencies and future foreign currency transactions.

Accounting Policies

Development projects include expenses, including wages and salaries and amortisation directly or indirectly attributable to the company's development activities and meeting the criteria for recognition. Development costs are measured at cost. Capitalised development costs are amortised on a straight-line basis after the completion of the development work over the useful lives of the assets.

Amortisation of development costs is based on the estimated useful lives of the assets and contractual periods of rights. Development costs that do not meet the criteria for recognition in the balance sheet are recognised in the income statement.

Receivables

Receivables are measured in the balance sheet at amortised cost, usually equivalent to nominal value. The value is reduced by write-downs for expected losses following an assessment of each receivable.

Cash

Includes cash balances.

Reserve for development cost

Reserve for development cost comprise recognised development cost. The reserve cannot be used for dividends or deficit coverage. The reserve is decreased or increased if the recognised development cost is depreciated or seized to be part of the activities. This happens by transfer directly to retained profit.

Payables

Payables are measured at cost, equivalent to nominal value.

Tax payable and deferred tax

Current tax liabilities and tax receivable are measured in the balance sheet as tax calculated on the taxable income for the year, adjusted for tax on taxable for previous years and tax prepaid.

Deferred tax on temporary differences between the tax base of assets and liabilities and their carrying amounts is measured under the balance sheet liability method. Deferred tax is measured on the basis of the tax regulations and rates that, according to the rules in force at the balance sheet date, will apply at the time the deferred tax is expected to crystallise as current tax. Changes in deferred tax as a result of changes in tax rates are recognised in the income statement.
